DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-33 of U.S. Patent No. 7,224,769 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because patented claims anticipated the current applications claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Miles (US Patent 5,631,943).

With respect to claims 1, 6-8, 10, 12, 14, 16, 17, 19, 21 and 23, Miles teaches a portable x-ray device, comprising: an x-ray source shielded with a low-density insulated material; and an integrated power system; wherein the x-ray device has a high current load (Fig. 1; column 4, lines 21-38; column 6, lines 10-19).

With respect to claims 2, 3, 11, 15, 17, 18, 20, 22 and 24, Miles teaches a low voltage power supplies, wherein each power supply provides a power ranging from about 20 to about 50 kV (column 6, lines 10-19).

With respect to claim 4, Miles teaches that the power system provides a continuous high voltage DC power (column 6, lines 20-36).

With respect to claims 5, Miles teaches an integrated display means (column 4, lines 37-42).

With respect to claims 9 and 13, Miles teaches the shielding further comprises a high-Z substance, preferably formed from LITHARCH, comprising compounds of Pb (lead) (column 4, lines 26-28).
